Ambu® SmartMan
Skills Measurement, Testing & Validation

NEW

For the First Time, CPR Skills Accurately Measured, Tested, Compared & Validated Against Nationally Published Standards

RUNS ON Ambu✚ **POWERED BY** V4EMS

Introducing Ambu® SmartMan, an Integrated Manikin & PC Solution created specifically for Health Care Professionals. SmartMan Measures, Tests and then Validates Primary CPR Skills, using the Ambu® Man Model C Adult-sized Training Manikin, connected through a Technical Integration Kit (TIK) to a Patent-Pending Software Testing Algorithm.

Ambu® SmartMan

- Provides Accurate Feedback, Improves User Performance & Technique, Saves More Lives.
- Scientifically Measures Crucial CPR parameters, to an Accuracy of 1/100th of an inch & 1/100th of a second.
- Securely Stores Test Parameters (offsite), to Address possible Legal & Compliance Concerns.
- Validates that Professionals do Meet Required Published Standards:
  - 2005 New Guidelines (30:2)
  - 200 x Chest Compressions only CPR
  - Other International Standards
